NOTICE OF APPLICATION TO APPROPRIATE WATER BY PERMIT

APPLICATION: 31294

DATE FILED: February 7, 2002

Notice is hereby given that Red Hills Vineyard Company has filed an application for a water right permit for diversion of water from two Unnamed Streams tributary to Thurston Creek and Thurston Creek tributary to Thurston Lake (closed basin) in Lake County. The State Water Resources Control Board (SWRCB) will determine whether a water right permit should be issued for the application and, if so, whether conditions are needed in the permit to protect the environment, the public interest, and downstream water users. This notice provides a description of the proposed project and also describes the procedure and time frame for submittal of protests against the application. This notice may be viewed at the Division of Water Rights' web-site at www.waterrights.ca.gov. Any correspondence directed to the applicant should be mailed to:

Red Hills Vineyard Company
c/o Drew L. Aspegren
Napa Valley Vineyard Engineering
176 Main Street, Suite B
St. Helena, CA 94574

Description of Project

The applicant proposes to construct four offstream pit-type reservoirs and four diversion structures. (1) Crimson Ridge Reservoir will have 500 acre-feet (af) capacity with a surface area of 20 acres and water depth of 40 feet. (2) Amber Knolls Reservoir will have 50 af capacity with a surface area of 3 acres and water depth of 25 feet. (3) Red Hills Reservoir will have 50 af capacity with a surface area of 2.5 acres with water depth of 28 feet. (4) Reservoir #4 will have 400 af capacity with a surface area of 20 acres and water depth of 30 feet. The water will be diverted to the reservoirs by pumping from stream or sump. The diversion rate to Crimson Ridge Reservoir and Amber Knolls Reservoir will be 6 cubic feet per second (cfs), the diversion rate to Red Hills Reservoir will be 3 cfs, and the diversion rate to Reservoir #4 will be 5 cfs. The total diversion rate from all 4 points of diversion shall not exceed 20 cfs. The reservoirs will be inter-connected to allow for transfer of water between reservoirs both during and the after the proposed diversion season. The water diverted to the reservoir will be used for irrigation and frost protection of 1,480 acres of vineyard within a gross area of 3,430 acres.

The project is located approximately five miles southeast of Kelseyville and three miles southwest of Wheeler Point.

"The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.swrcb.ca.gov>"

Summary of Application

County: Lake
Source: (1)(2) Thurston Creek tributary to Thurston Lake (closed basin)
(3)(4) Unnamed Streams tributary to Thurston Creek
Points of
Diversions: Located (1) within the NW¼ of NE¼ of Section 33, T13N, R8W, MDB&M
(2) within the NW¼ of NE¼ of Section 3, T12N, R8W, MDB&M
(3) within the NW¼ of NE¼ of Section 4, T12N, R8W, MDB&M
(4) within the SE¼ of NW¼ of Section 33, T13N, R8W, MDB&M.
Amount: 1,000 acre-feet per year of storage.
Season: November 1 to June 1 for storage.
Purposes: Irrigation and frost protection.
Place of Use:

Section	Township	Range	B & M	If Irrigated	
				Number of Acres	Presently Cultivated (Y/N)
19	13N	8W	MD	79	NO
20	13N	8W	MD	84	NO
21	13N	8W	MD	47	NO
27	13N	8W	MD	25	NO
28	13N	8W	MD	118	NO
29	13N	8W	MD	203	NO
33	13N	8W	MD	158	NO
34	13N	8W	MD	51	YES/NO
30	13N	8W	MD	27	NO
3	12N	8W	MD	425	YES
4	12N	8W	MD	248	YES/NO
10	12N	8W	MD	15	NO
			Total	1,480	

Environmental Information

The lead agency will prepare the appropriate environmental documents for the project according to the California Environmental Quality Act (CEQA) and its guidelines, and will determine whether or not the project will cause a significant effect on the environment. If you are not filing a protest, but wish to submit information that indicates the project may cause a significant effect on the environment, please send this information to Steven Herrera, SWRCB, Division of Water Rights, P.O. Box 2000, Sacramento, CA 95812-2000. This information will be reviewed in accordance with CEQA.

PROTEST SUBMITTAL INFORMATION

Protest Requirements

A person may file a protest based on any of the following factors:

- Interference with prior water rights.
- Adverse environmental impact.
- Not in the public interest.
- Contrary to law.
- Not within the jurisdiction of the SWRCB.

All protests must clearly describe the objections to approval of the application and the factual basis for those objections. There must be a clear link between the proposed project and the objection to its approval. If the objection is based on interference with prior water rights, the protest must describe specifically what injury would result if the application is approved. In addition, the party claiming interference with prior rights must provide specific information describing the basis of the prior right, the date the use began, the quantity of water used, the purpose of use and the place of use. Please note that any water right permit issued by the SWRCB is subject to vested water rights and will include conditions to protect such rights.

If the protest is based on an allegation that the proposed appropriation would not be within the SWRCB's jurisdiction, would not best conserve the public interest or public trust uses, would have an adverse environmental impact, or would be contrary to law, the protest must be accompanied by a statement of facts supporting the allegation.

For example, public interest protests should clearly indicate how the appropriation will affect the public; environmental protests should identify specific impacts and provide supporting recitals on the effect of the proposed project on plants, animals, fish, erosion, pollution, aesthetics, etc.; public trust protests must identify the navigable waters and public trust values that would be affected by the proposed project and how the project will impact public trust values.

All protests should include a description of any measures that could be taken to resolve the protest. The protest also must indicate the manner in which the protestant served upon the applicant a duplicate copy of the protest.

If sufficient information is not submitted, the SWRCB may reject the protest or request that the protestant submit additional information. Protests of a general nature (not project specific) or protests that are inconsistent with constitutional or legislated state policy will not be accepted. A request for information or a request that studies be conducted does not constitute a protest.

Procedure for Submitting Protests

Protests should be submitted on standard protest forms available from the Division of Water Rights' website at www.waterrights.ca.gov/forms/ or upon request from the Division of Water Rights. A pamphlet that provides additional information relating to water rights and the procedure for filing protests is also available on the website or by mail. Any requests or the submittal of the completed protest form should be directed to the engineer listed as the contact person at the end of this notice. **A copy of the completed protest form must also be mailed to the applicant.**

Protest Submittal Deadline

Protests submitted in response to this notice must be received by the Division by 3:00 p.m. on the **60th** day after the date of this notice (the close of the protest period). Protests may be submitted by any of the following methods:

1. Mailed to Division of Water Rights; P. O. Box 2000; Sacramento, CA 95812-2000
2. Faxed to the Division at (916) 341-5400
3. E-mailed to the engineer listed below under the heading "Contact Person"
4. Hand-delivered to the Division office located at 1001 "I" Street, 14th Floor, Sacramento, CA

If you choose to fax or e-mail the protest due to the constraints of the noticing period, the fax or e-mail must be followed by timely delivery of an original signed copy, either personally or by mail, to the Division of Water Rights in order for the protest to be accepted. The SWRCB will respond to all protests within 60 days of the final day to file a protest. **Protests not submitted by the close of the protest period will be subject to rejection.**

For good cause, the SWRCB may grant an extension of time to file a protest. It is the protestant's responsibility to contact the engineer listed below as "Contact Person" to request the extension prior to the end of the protest period.

Resolution of Protests

The applicant will have 30 days to respond to a protest once it is accepted by the Division of Water Rights. The protestant and the applicant are expected to make a good faith effort to resolve the protest within 180 days from the close of the protest period.

This is a "major" project (the proposed diversion is greater than 3 cubic feet per second by direct diversion or greater than 200 acre-feet per year by storage) as defined by section 1348 of the Water Code. Therefore, any protest issues not resolved by the applicant or by provisions of section 1335 of the Water Code will be decided by the State Water Resources Control Board following an evidentiary hearing.

CONTACT PERSON

To obtain additional information regarding this project, or to obtain copies of protest forms or

general information pamphlets, please contact Yoko Mooring by phone at (916) 341-5362. Information and protest forms are also available at the Division's website: www.waterrights.ca.gov/forms/.

Date of Notice: **May 23, 2003**
